31st August, 2021

I am Dr. Jenson Joseph, working as Associate Professor in Mechanical Engineering. It is immense happiness in writing a LOR for Mr. Srinath Kamath. I have known him the whole time during his undergraduation. It is very evident that he has shown great work while pursuing his undergraduation in Mechanical Engineering. I was his class coordinator for four years of the course and I feel I'm the apt person to say something very lucid about him. When I saw him the first day, he was so energetic student who was filled with curiosity in asking pragmatic solutions for each theory which I have taught. I got an opportunity to test his keen skillset in Mechanical engineering Drawing, where he was so diligent, concentrated and a stalwart in achieving what he has decided to draw. He had been performing so great throughout the course, which is evident and ranked among the top and also stood consistently throughout his undergraduation on regards to his mindset and score.

Mr. Srinath Kamath, has done his project on an interesting topic entitled "InstaAqua - Portable Desalination Unit" for which he has strived so hard learning Manufacturing, and getting to know each point about the theory very pragmatically. He also done many innovative projects like "Grovia - Automated Intelligent Plant Monitoring System" for which he was awarded First Runner Up by the Kerala Startup Mission Calicut University Idea Fest for prototyping and "GroVSpaces - An e-Commerce platform to promote Organic farming in Urban areas"

As it's very much notable that Srinath Kamath is someone who will for sure change the world by seeing it from a different perspective, which is what all Mechanical Engineers would do but he is being very different can bring up so many critical innovations if provided an opportunity in your university.

As a matter of fact, he's multilingual, who knows different languages helping himself in interacting with various people around the world.

One specific subtle drawback was, he keeps on hanging to something which he has not got the answer for it yet, which upon reconciliation and pragmatically explaining to him, he settles down.

With such a great attribute, he is a person with a kind heart, loving and determined student, who has great vision and goals yet to achieve. I would strongly recommend Mr. Srinath Kamath for admission in your prestigious allowing him to Master's degree. I am sure he proves himself once again by uplifting himself again by gathering and acquiring knowledge making your university proud and which lets him to prosper in his career.
